

# Hydro Extrusions Benelux

## Declaration of recycling content

Hydro Extrusion Drunen BV hereby declares that in 2022, its recycling unit located in Drunen, the Netherlands, produced Hydro RESTORE (aluminium extrusion billets) of an average of 73% recycled material, both post-consumer scrap and pre-consumer scrap<sup>(1)</sup>.

Hydro Extrusions Benelux has the ambition to increase the share of post-consumer scrap in Hydro RESTORE produced in Ghlin and Drunen in the coming years.

Ben Mul  
Plant Manager Drunen

<sup>(1)</sup> With a split of 24% post-consumer scrap and 76% pre-consumer scrap.  
Total average mix in a Hydro RESTORE billet produced in Drunen is 17% post-consumer scrap, 56% pre-consumer scrap and 27% primary aluminium.
